

I pay \$10 a month for my xm satellite radio. I paid over \$200 to get my xm satellite radio in my car. I am a loyal xm radio fan and i feel the addition to xm instant travel and weather is one of the best additions ever to radio. You are still going to have fair competition between local stations providing news and weather and xm radio. Xm radio gives you the news instant while fm radio doesn't. It takes forever to here what you want. The same goes with local television shows. Xm radio is doing the right thing and the FCC is not.
